

**\$10,000 REWARD FOR
HEALTHY LIVER WANTED FOR LIVER
TRANSPLANT!**

It's necessary for survival; **Must be found within 24 hrs** or else patient will not live! It plays an important part in dynamic equilibrium and is the largest gland in the human body. According to sources it was last seen below the diaphragm in the thoracic region of the abdomen.

It can be prone to cirrhosis and become scarred so it must be **APPROACHED WITH CAUTION**, found and given in good condition! Cirrhosis is most commonly caused by alcoholism, hepatitis B and C and fatty liver disease

The liver has worked with renowned accomplices such as the digestive system by getting rid of toxins out of the blood, and the circulatory system by blood being pumped out of it.

If you find this liver **contact (1-800)-fnd-liver!!!!**
