

## Permanent Records of Cirrhosis of the Liver:

Cirrhosis has been arrested several times for the destroying and vandalizing of the liver.

One of your liver's most important functions is to break down food and convert it into energy when you need it

The liver is the largest glandular organ of the body. It weighs about 3 lb. It is reddish brown in color and is divided into four lobes of unequal size and shape. The liver lies on the right side of the abdominal cavity beneath the diaphragm.

The rest of the body is counting on your help in find this criminal and putting him behind bars!

WARNING:

Cirrhosis is a very dangerous criminal, if found the police department highly suggests you don't go within a 100 foot radius of Mr. Cirrhosis. He is suspected to be armed and dangerous!!

If you have any information of this criminal please contact the police department at 1800-CRIMINAL. All calls will be confidential.\*
